

Please reject the National Association of Broadcaster's petition (04-160). I am a consumer, and a subscriber to XM Satellite Radio. I believe if XM was made to stop offering traffic and weather that I would lose a valuable choice in how I receive my traffic and weather information. I do not want to have to deal with the incessant popular music and typical banter of radio talk show hosts in the morning when all I want is to know the weather and traffic conditions in my area. XM provides me what I need to know within 2 minutes so that I can better plan my commute and my day. Since I pay for XM Satellite Radio broadcasts, I should be allowed to receive what I want from XM Satellite Radio. I do not need the National Association of Broadcasters telling me what I can and cannot listen to so that they can sell more advertising on their terrestrial stations. Again, please reject the National Association of Broadcaster's petition # 04-160. Thank you for your time and consideration.

Sincerely,  
Daniel F. Salvagno
